

“Prober.com has been partnering with ERS for nearly 20 years, (since 2001). It has been a great partnership and as an automatic prober refurbisher we worked early on with ERS’ German headquarters directly to integrate these high quality systems into our probers. We have always appreciated the high quality, leading edge design and professional support for these systems. Congratulations on turning 50!”

Jerry Kjensrud, Founder, Prober.com  
Dennis Bonciolini, President and CEO, Prober.com

“Congratulations on your 50th anniversary and successful years of thermal innovations enabling our industry roadmap. We greatly appreciate having you in our SEMI family and thank you for your valuable support. Wishing you continuous success and prosperity.”

Laith Altimime, President, SEMI Europe

“As the leading supplier of thermal chucks and debonding solutions, ERS is providing the best-in-class products in response to the thermal processing challenges. Leveraging on its remarkable patented technology, ERS is continuously enabling new possibilities for reinventions and breakthroughs.”

Favier Shoo, Technology and Market Analyst, Yole Développement

“We at 3D InCites would like to congratulate ERS Electronic on the celebration of their 50th Anniversary. That is an impressive achievement for a semiconductor equipment company. It means they’ve been around almost as long as the industry itself. We are proud to call them 3D InCites community members, and look forward to many more years helping to spread the word about the important role they play in the heterogeneous integration space.”

Françoise von Trapp, Queen of 3D, 3D inCites

“Congratulations to ERS on their 50th anniversary! ERS has been a strong and active sponsor and participant of both the SWTest San Diego and SWTest Asia conferences. Their strong leadership in the industry and support of industry events shows a commitment to continue to help evolve the industry in every capacity. We wish ERS continued success for the next 50 years”

SWTest Executive Committee

“On behalf of MPI Corporation, we extend our heartiest congratulations to ERS for 50 great years of thermal innovations and success. We are excited to be an ERS partner and developing the AirCool® PRIME technology together to offer the most versatile thermal chucks for the engineering market targeting ultra-low noise, 1/f, RTN, RF, mmW and high-power applications. Best wishes for a continued bright future.”

Dr. Stojan Kanev, General Manager  
Advanced Semiconductor Test Division, MPI Corporation

“For years we’ve been working with ERS who always delivers amazing products. Our feedback from the market confirm that they are stable, reliable and long-lasting with high accuracy. Any customer looking to be cost effective in the long-term should try ERS chuck systems – you will be impressed. A 50th anniversary takes generations of constantly moving forward to meet tough challenges. We are proud to work with ERS and look forward to the years to come. Congratulations.”

Steven Chan, Chain Logic International Corporation
